PANDITAAI

THE कौशल MARKETPLACE

कौशल (Hindi) · 技能 (Japanese) · 기술 (Korean) · مهارة (Arabic) · ทักษะ (Thai) · НАВЫК (Russian) · habilidad (Spanish) ·
compétence (French)

Capturing human expertise. Training robots in NVIDIA
Omniverse.

01_THE_PROBLEM

TEACHING ROBOTS HUMAN SKILLS

Software replicates instantly. Physical skills don't — a master chef's knife work, a martial artist's precision, a gardener's touch. We capture expertise from human experts and teach it to robots using NVIDIA Isaac Sim in Omniverse, making any skill downloadable.

SIM TRAINING VS REAL-WORLD

THE SOLUTION IS HERE

02 _ THE _ INSIGHT

HUMAN TO ROBOT SKILL TRANSFER

01. CAPTURE

Work with human experts — martial artists, chefs, dancers, gardeners — to record high-fidelity motion and decision data.

02. SIMULATE

Replicate expert behavior in NVIDIA Omniverse using Isaac Sim. Train robots through millions of parallel simulation cycles.

03. DEPLOY

Transfer trained skills to physical robots via sim-to-real. A master chef's knife technique, now executable by any robot arm.

THE PANDITAAI PIPELINE

01

CAPTURE

Record motion from human experts via VR teleoperation and motion capture.

02

SIMULATE

1,000 robots training in parallel inside Isaac Sim. 1 hour = 1,000 hours.

03

VALIDATE

Stress-test across randomized physics, friction, and edge cases in sim.

04

PUBLISH

List on the PanditaAI Marketplace with performance benchmarks.

05

DEPLOY

OTA delivery to robots on NVIDIA Jetson / IGX hardware.

EXPERT CAPTURE

THE_ARCHITECTURE

HOW IT WORKS

01 EXPERT MOTION CAPTURE

VR teleoperation records human skill data — movements, force, timing, decision points.

02 OMNIVERSE + ISAAC SIM

1,000 simulated robots train in parallel. 1 hour of sim = 1,000 physical hours of learning.

03 SIM-TO-REAL TRANSFER

Domain randomization ensures skills work on real hardware from day one.

REVENUE_MODEL

SKILL LICENSING

PER-USE

License-based model. Each skill licensed per-robot. Human experts earn royalties on every deployment of their captured skills.

PLATFORM FEE

15-20%

Marketplace take rate on every transaction. Revenue share with human experts whose skills are captured and replicated.

FLEET LICENSE

ENTERPRISE

Volume licensing for enterprises deploying skills across robot fleets. Includes OTA updates, versioning, priority support.

DEPLOYMENT_TIMELINE

Q2_2026 [NOW]

PROTOTYPING

Procuring Unitree G1 humanoids. Building expert motion capture pipeline. Initial skill recording sessions.

Q4_2026

BETA_MARKETPLACE

First 5 skills trained in Isaac Sim. Beta marketplace live. Sim-to-real transfer validated on Jetson Orin.

Q2_2027

PUBLIC_LAUNCH

20+ skills live. Public marketplace on panditaai.com. Expert partnership program open.

Q4_2027

COMMUNITY_SCALE

Largest open skill catalog for robots. 100+ expert partners. Enterprise fleet deployments.

COMPETITIVE_LANDSCAPE

Why we win: Competitors build closed, full-stack humanoids. We build the open skill layer — any robot, any form factor, any manufacturer can license human-captured skills from our marketplace.

FOUNDING_TEAM

PHOTO PLACEHOLDER

SUMIT AGRAWAL

CEO & FOUNDER

Senior software engineer with 8+ years shipping production AI, Web3, and cloud-native systems — scaled institutional crypto staking to \$1.2B+ AUM, built multi-agent and MCP/WebMCP tooling, and fine-tuned LLMs for domain use cases. NVIDIA Inception member. Leading product, technology, and go-to-market at PanditaAI.

PHOTO PLACEHOLDER

SHAILENDRA AGRAWAL

PRESIDENT

Veteran electrician, mechanic, and hardware specialist with decades of hands-on experience. Deeply passionate about building humanoid robots — leads hardware procurement, integration, and physical-systems engineering for PanditaAI's robot fleet.

Operations & legal			

A large crowd of humanoid robots, some with blue accents, are gathered in a dark, industrial environment with a checkered floor. The robots are in various poses, suggesting movement or a performance. The background is dark and filled with more robots, creating a sense of a large-scale event or assembly.

THE DEFAULT LAYER FOR MOTION

CAPTURING HUMAN EXPERTISE. REPLICATING IT IN ROBOTS. AT
PLANETARY SCALE.
